# SILENCE

## IN THE RECORDINGS

Through the application of Principle, these experiential classwork sessions, which are spontaneous outpourings and impartations, offered as a result of silent awareness and inner surrender, lead the student from spoken words of teaching, to the Experience of the Living Word Itself, a state and depth of Silence in which that Perfect Peace that passeth all understanding might be known. As such, all silences entered into during the classwork are retained in the recordings, to give the listener the feeling of being "at" the Class, participating in and partaking of that state of consciousness that is expressing, unfolding, revealing, and disclosing itself.
